Specializations

- *Good Agricultural Practices (GAP)*
- *Agricultural Extension*
- *Forest Environment Conservation*
- *Sustainable Rural Development, etc.*

Current Projects

*Focusing on restoring the environment of rural
area through reforestation and related activities,
such as holding workshops and trainings among
formed forest managing groups in Kampong Cham
Province, Cambodia. Also, the project on school
greening aiming for forest environmental education*

*has been implemented in Tbong Khmum Province,
Cambodia. As a part of the mentioned projects,
ESD (Education for Sustainable Development)
trainings have been conducted. In ESD trainings,
formed groups between Japanese and Khmer
trainees cumulate meaningful experiences through
conducting reforestation activity, visiting rubber and
cashew farms and bamboo bridge, etc. with deep
perception of the importance of conserving forests
as well as natural environments.*

Languages

English / Japanese

Publications

There are some publications, and dominant ones are as follows.
